

VestATM.

THE 30-POINT PAYOUT PLAYBOOK

One clean move. A defined exit.

NQ on Vest. Two simple setups. A 30-point target and stop.
The aim: turn a clear execution plan into a repeatable process.

30

POINT TAKE PROFIT

30

POINT STOP LOSS

250

USDC PAYOUT TARGET

01 / CHOOSE THE SETUP

IMPULSE + RETEST

Price breaks a clear level with force.
Wait for a brief pullback that holds.
Enter on a close back with the move.

SCHEMATIC / LONG EXAMPLE

LEVEL + REJECTION

Mark the level before price arrives.
Let price reject it and close away.
Enter in the rejection direction.

SCHEMATIC / LONG EXAMPLE

THE FILTER IS CLARITY.

Use one setup. Reverse the logic for shorts. If the idea needs more than a 30-point stop to be invalidated, this is not the setup for this fixed-stop plan. These are entry templates, not a demonstrated win-rate or guaranteed edge.

EXECUTE. THEN EXTRACT.

02 / THE ORDER, THE MATH, THE PAYOUT

LONG EXAMPLE

ENTRY 30,000

TP 30,030

SL 29,970

For a short: TP = entry - 30 / SL = entry + 30. Anchor to the actual fill.

SIZE IN DOLLARS PER POINT.

30 points x \$8.33/point = about \$250 gross trading P&L.

A 30-point stop loses about \$250 before costs. That is not a \$250 payout.

IF YOU WANT 250 USDC AFTER YOUR SPLIT

\$/point = (250 / split + costs) / 30

Example only: 80% split + \$8 estimated round-trip costs

\$10.68 / pt

30-point win: ~\$320.50 gross - \$8 = \$312.50

80% claim share: ~\$250 | Stop loss: ~\$328.50

Replace \$8 with your actual fees + spread/slippage. Costs change with size.

01

PLACE + PROTECT

Confirm size and fill. Attach TP/SL.
Check stop execution type and
available room above the fail floor.

02

CLOSE + CHECK

Read realized P&L after costs.
Earlier losses reduce claimable
profit; each win is not a new payout.

03

CLAIM + WITHDRAW

Claim from the Live account.
Then withdraw from Primary
to your chosen receiving wallet.

Leverage controls required margin, not dollars per point. At 1:1 price distance,
fees make the net loss larger than the net win. Stops can slip or fail to fill.

A \$250 target is a plan, not guaranteed income. Check current account terms.
